

Quality, is the basis on which our company is built.

“Quality is relevant to the **quality of products and processes**, with *environment, health and safety* as key elements”.

Quadrant CMS uses efficient management processes (\*), in order to:

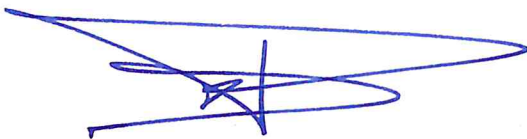

- Prevent and control risks
- Recognize and seize opportunities
- Control the quality of our processes in order to deliver parts that meet the specifications every time
- Limit and control the cost
- Deliver our customers on time with the right products
- Work in a safe place without excess harm to the environment
- Comply with all legal and regulatory requirements
- Continuously improve

“Continuous improvement” leads to:

- Improving customer satisfaction
- Less complaints, less accidents and a smaller impact on the environment
- An excellent and improving relationship with our stakeholders
- Employees with job satisfaction
- Acceptable results for our shareholders

Quadrant CMS provides every employee with the necessary information in order to not only understand the mentioned quality objectives, but to practice them in the most economical way.

“All above will result in a **stable, safe** corporation where **continuity** as well as **growth** rests assured.”

**Petrus van Damme**  
*Managing Director*
